

Education

Engage and interact with the digital generation

How can Omnivex Help Your School?

Easily connect, distribute and present targeted, real-time information across your buildings and campus on any screen.

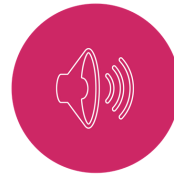

Interact

Create an engaging and interactive environment for students and staff

Navigate

Make navigation easy with interactive wayfinding and digital signs

Communicate

Share real time about events, announcements, news, & weather

Integrate

Connect digital signage to backend systems and alarms

Engaging and interacting with a generation of students raised surrounded by media is driving significant change amongst education institutions. Students today expect and prefer digital communications, and as a result devices such as digital signs and mobile phones have become a cost-effective tool for schools to utilize. Dynamic digital communications are enabling schools to improve areas ranging from emergency notifications to wayfinding to events and employee communications.

"Omnivex Moxie provides a really robust platform to work off of. It enables me to efficiently create and manage a wide variety of content for our diverse departments,"

David Whittington, Multi-media specialist at Rotman School of Management

Case Study: Rotman School of Management

Over 100 event/year
27 Screens

The Rotman School of Management at the University of Toronto is redesigning business education for the 21st century with a curriculum based on Integrative Thinking. Omnivex Moxie has helped the school improve building navigation and the communication of relevant information and events to building visitors. "The new digital signage around the school gives us a voice in the physical space and allows us to deliver relevant messaging at the time it's needed the most," said Eugene Grichko, Brand Experience and Engagement Specialist Marketing at Rotman School of Management.
